

ABOUT

ALLISON REGAN

Hello, my name is Allison Regan, and I am a senior from Chicago, Illinois. I am a neuroscience major on the pre-med track and also part of the honors college. On campus, I am heavily involved in research as part of Dr. Chumley and Dr. Boehm's lab which focuses on different therapies and lifestyle risk factors for Alzheimer's Disease. I am also a coordinator for the Pre-Health Leadership Council and treasurer of Psi Chi, a national honors society for psych/neuro/child development majors. Outside of campus, I enjoy hanging out with friends, watching Jeopardy, doing something artsy, drinking coffee, and going to the Trinity Park Duck Pond. I am very excited to be the neuroscience peer mentor for CSE and look forward to answering your questions and helping you the best I can.
