

ABOUT

# CHIE NGUYEN

Hey everyone! My name is Chie Nguyen, a senior in Biology major on the Pre-Med track. Originally, I am from Ho Chi Minh City of Vietnam, and I love the food there! At TCU, I am researching for Dr. McGillivray's lab in collaboration with Memel at UNTHSC. I also work for the Chemistry Department's Stockroom (the mysterious room 474 next to Dr. Conrad's office). In the summer, I spend most of my time researching and shadowing the Harris ER downtown. Besides that, I love traveling, cooking, and playing with cats and dogs. Even in my third year at TCU, I was still sometimes nervous and did not know a lot of things. We live, we learn, and we grow. You are not alone, we're all in this together. If you ever need to chat or anything, please feel free to reach out or swing by, I am here to help!
