

ABOUT

# Gabriel McCarthy

Hello! My name is Gabriel McCarthy. I am from Burleson, Texas, so I'm a local. I am a 3rd Year Physics and Mathematics double major. Currently, I'm primarily involved with Dr. Dobrovolny's lab, where we use computational biophysics to do research. One day, I hope to be a full-fledged physicist and conduct my own research. Outside of that, I am the president of the Math Club, and a member of TCU's Society of Physics Students, Leadership and Academics for STEM Students Organization, and HCCS. Outside of classes,

I love reading books on just about anything, video games(any type), skateboarding, photography, and spending time with friends. I enjoy getting to know people and helping others, so if you ever need help, just let me know!
