

MS Nutrition Coordinated Program Prerequisite Plan

All applicants must hold a bachelor's degree from a regionally accredited U.S. institution or provide a foreign degree equivalency evaluation demonstrating the equivalent of a U.S. bachelor's degree from an approved credential evaluation service. Prerequisites must be complete (or be in progress of completing) and have earned a 'C' or better prior to beginning the program. For additional questions on course equivalency and satisfaction of prerequisites, contact nutrition@tcu.edu

MS Nutrition Coordinated Program Prerequisites:

- General Chemistry I
- Chemistry II with lab
- Organic Chemistry
- Physiology
- Microbiology with lab
- Nutrition
- Nutrition Throughout the Lifecycle
- Medical Terminology
- Human Behavior (Psychology, Sociology, or Anthropology)

The program start date is May (May semester) for individuals entering the program with a DPD verification statement and August (fall semester) for individuals entering the integrated didactic pathway. The program follows the academic calendar and semester dates set by TCU registrar: <https://registrar.tcu.edu/files/five-year-academic-calendar.pdf>
